

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

Product identifier

Product name: Santoflex(TM) 44PD

Product No.: P3405503

Additional identification

Chemical name: N,N'-di-sec-butyl-p-phenylenediamine
CAS-No.: 101-96-2

Relevant identified uses of the substance or mixture and uses advised against

Identified uses: antioxidant (industrial), Stabilizer

Uses advised against: None known.

Details of the supplier of the safety data sheet

Manufacturer / Supplier

Eastman Chemical Company
200 South Wilcox Drive
Kingsport, TN 37660-5280 US
+14232292000

Visit our website at www.EASTMAN.com or email emnmsds@eastman.com

Emergency telephone number:

For emergency health, safety, and environmental information, call 1-423-229-4511 or 1-423-229-2000.

For emergency transportation information, in the United States: call CHEMTREC at 800-424-9300 or call 423-229-2000.

SECTION 2: Hazards identification

Hazard Classification:

Health Hazards

Acute toxicity (Oral)	Category 3
Acute toxicity (Dermal)	Category 3
Acute toxicity (Inhalation)	Category 3
Skin Corrosion/Irritation	Category 1C
Serious Eye Damage/Eye Irritation	Category 2A
Skin sensitizer	Category 1A
Specific Target Organ Toxicity - Repeated Exposure	Category 2

OSHA Specified Hazards: not applicable

Warning label items including precautionary statement:

Pictogram:

Signal Words: Danger

Hazard Statement(s): H301: Toxic if swallowed.
H311: Toxic in contact with skin.
H331: Toxic if inhaled.
H314: Causes severe skin burns and eye damage.
H317: May cause an allergic skin reaction.
H319: Causes serious eye irritation.
H373: May cause damage to organs (Liver) through prolonged or repeated exposure.

Precautionary Statement:

Prevention: P260: Do not breathe dust/fume/gas/mist/vapors/spray.
P264: Wash hands thoroughly after handling.
P270: Do not eat, drink or smoke when using this product.
P271: Use only outdoors or in a well-ventilated area.
P272: Contaminated work clothing must not be allowed out of the workplace.
P280: Wear protective gloves/protective clothing/eye protection/face protection.

Response: P301+P330+P331: IF SWALLOWED: Rinse mouth. Do NOT induce vomiting.
P303+P361+P353: IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower.
P333+P313: If skin irritation or rash occurs: Get medical advice/attention.
P304+P340: IF INHALED: Remove person to fresh air and keep comfortable for breathing.
P305+P351+P338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P337+P313: If eye irritation persists: Get medical advice/attention.
P310: Immediately call a POISON CENTER/doctor.
P361+P364: Take off immediately all contaminated clothing and wash it before reuse.

Storage: P403+P233: Store in a well-ventilated place. Keep container tightly closed.
P405: Store locked up.

Disposal: P501: Dispose of contents/container to an appropriate treatment and disposal facility in accordance with applicable laws and regulations, and product characteristics at time of disposal.

Hazard(s) not otherwise classified (HNOC): None known.

SECTION 3: Composition/information on ingredients

Substances / Mixtures**General information:**

Chemical name	Concentration	Additional identification	Notes
N,N'-di-sec-butyl-p-phenylenediamine	97 - 100%	CAS-No.: 101-96-2	

* All concentrations are percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

This substance has workplace exposure limit(s).

SECTION 4: First aid measures**General:**

Get medical attention if symptoms occur. Show this safety data sheet to the doctor in attendance. If breathing is difficult, give oxygen. If not breathing, give artificial respiration. Place unconscious person on the side in the recovery position and ensure breathing can take place. Ensure that medical personnel are aware of the material(s) involved and take precautions to protect themselves.

Description of first aid measures**Inhalation:**

Move into fresh air and keep at rest. Get medical attention immediately. For breathing difficulties, oxygen may be necessary. Persons who have inhaled vapours or smoke fumes have to be put under medical observation for at least 48 hours, due to the delayed appearance of poisoning.

Eye contact:

Immediately flush with plenty of water for at least 15 minutes. If easy to do, remove contact lenses. Get medical attention immediately.

Skin contact:

Immediately remove contaminated clothing and shoes and wash skin with soap and plenty of water. If skin irritation or an allergic skin reaction develops, get medical attention. Wash contaminated clothing before reuse. Destroy or thoroughly clean contaminated shoes.

Ingestion:

If swallowed, rinse mouth with water (only if the person is conscious). Call a physician or poison control center immediately. Do not induce vomiting unless directed to do so by medical personnel. Never give liquid to an unconscious person. If vomiting occurs, keep head low so that stomach content doesn't get into the lungs. Provide fresh air, warmth and rest, preferably in comfortable upright sitting position. Loosen tight clothing such as a collar, tie, belt or waistband.

Most important symptoms and effects, both acute and delayed:

May cause abdominal pain with vomiting, nausea, diarrhea, or dizziness. Warning symptoms may include weakness, headache, tightness of chest, blurred vision, nonreactive pinpoint pupils, salivation, sweating, nausea, vomiting, diarrhea, and abdominal cramps. The product is strongly irritating to eyes and skin. Prolonged contact may cause burns. May cause allergic skin reaction.

Indication of any immediate medical attention and special treatment needed**Hazards:**

Toxic if swallowed, in contact with skin or if inhaled. Corrosive to skin. Causes serious eye irritation. May cause sensitization by skin contact. May cause liver damage based on animal data.

Treatment:

Treat symptomatically.

SECTION 5: Firefighting measures

General Fire Hazards:	Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. Keep upwind. In case of fire and/or explosion do not breathe fumes.
Extinguishing media	
Suitable extinguishing media:	Water spray, foam, dry powder or carbon dioxide.
Unsuitable extinguishing media:	Avoid water in straight hose stream; will scatter and spread fire.
Special hazards arising from the substance or mixture:	May ignite at high temperature. During fire, gases hazardous to health may be formed. Risk of chemical pneumonia after aspiration. Hazardous Combustion Products : carbon dioxide, carbon monoxide , soot , Oxides of nitrogen. Leaked material and fire-fighting water may pollute water system.
Advice for firefighters	
Special fire fighting procedures:	In case of fire: Evacuate area. Move container from fire area if it can be done without risk. Use water spray to keep fire-exposed containers cool. Prevent runoff from fire control or dilution from entering streams, sewers, or drinking water supply. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations.
Special protective equipment for fire-fighters:	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

SECTION 6: Accidental release measures

Personal precautions, protective equipment and emergency procedures:	No action shall be taken involving any personal risk or without suitable training. Keep unauthorized personnel away. Ventilate closed spaces before entering them. Do not breathe mist or vapor. Do not get in eyes and avoid contact with skin and clothing. Wear appropriate personal protective equipment. See Section 8 of the SDS for Personal Protective Equipment. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Caution: Contaminated surfaces may be slippery.
Environmental Precautions:	Prevent further leakage or spillage if safe to do so. Clear up spills immediately and dispose of waste safely. Do not contaminate water sources or sewer.
Methods and material for containment and cleaning up:	Small Liquid Spills: Use a non-combustible material like vermiculite, sand or earth to soak up the product and place into a container for later disposal. Large Spillages: Dike for later disposal. Collect spillage in containers, seal securely and deliver for disposal according to local regulations. Otherwise, absorb spill with vermiculite or other inert material, then place in a container for chemical waste. Clean surface thoroughly to remove residual contamination. Prevent runoff from entering drains, sewers, or streams.
Notification Procedures:	In the event of a spill or accidental release, notify relevant authorities in accordance with all applicable regulations.

SECTION 7: Handling and storage:

Precautions for safe handling:	Do not handle until all safety precautions have been read and understood. Handle product only in closed system or provide appropriate exhaust ventilation at machinery. An eye wash bottle must be available at the work site. Wear appropriate personal protective equipment. See Section 8 of the SDS for Personal Protective Equipment. Do not taste or swallow. Do not breathe mist or vapor. In case of inadequate ventilation, use respiratory protection. Do not get in eyes and avoid contact with skin and clothing. Wash promptly with soap and water if skin becomes contaminated. Remove contaminated clothing and wash it before reuse. Destroy or thoroughly clean contaminated shoes. Drain or remove substance from equipment prior to break-in or maintenance. Handle in accordance with good industrial hygiene and safety practice. See also Section 8 for additional information on hygiene measures.
Conditions for safe storage, including any incompatibilities:	Keep container tightly closed and in a well-ventilated place. Do not store in open or unlabelled containers. Avoid exposure to high temperatures or direct sunlight. Ground container and transfer equipment to eliminate static electric sparks. Store away from incompatible materials. Use appropriate containment to avoid environmental contamination. Keep away from food, drink and animal feeding stuffs. Store in accordance with local/regional/national/international regulations.
Specific end use(s):	No data available.

SECTION 8: Exposure controls/personal protection**Control Parameters****Occupational Exposure Limits**

Country specific exposure limits have not been established or are not applicable unless listed below.

Exposure controls

Appropriate engineering controls:	Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.
--	---

Individual protection measures, such as personal protective equipment

General information:	An eye wash bottle must be available at the work site. Provide access to washing facilities including soap, skin cleanser and fatty cream.
Eye/face protection:	Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. Recommendations: Wear safety glasses with side shields (or goggles). Use safety goggles and face shield in case of splash risk.

Skin protection**Hand Protection:**

It is a good industrial hygiene practice to minimize skin contact. If prolonged or repeated contact is likely, chemical resistant gloves are recommended. If contact with forearms is likely, wear gauntlet style gloves. Contact the glove manufacturer for specific advice on glove selection and breakthrough times for your use conditions. After contamination with product change the gloves immediately and dispose of them according to relevant national and local regulations.

Other:

Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. Wear a full, chemical-resistant protective suit to prevent skin contact. Protective clothing should be chemical/oil resistant. In case of splashes: Wear apron or special protective clothing. Promptly remove non-impervious clothing that becomes wet or contaminated.

Respiratory Protection:

Use a properly fitted, particulate filter respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection, use, and maintenance must be in accordance with regulatory requirements, if applicable. If engineering controls do not maintain airborne concentrations below recommended exposure limits (where applicable) or to an acceptable level (in countries where exposure limits have not been established), an approved respirator must be worn. In the United States of America, if respirators are used, a program should be instituted to assure compliance with OSHA Standard 63 FR 1152, January 8, 1998. Respirator type: Air-purifying respirator with an appropriate, government approved (where applicable), air-purifying filter, cartridge or canister. Contact health and safety professional or manufacturer for specific information.

Hygiene measures:

Handle in accordance with good industrial hygiene and safety practice. Do not eat, drink or smoke when using the product. Wash at the end of each work shift and before eating, smoking and using the toilet. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reuse. Keep away from food, drink and animal feeding stuffs.

Environmental Controls:

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels. Do not contaminate water sources or sewer.

SECTION 9: Physical and chemical properties**Information on basic physical and chemical properties****Appearance**

Physical state:	liquid
Form:	Oily liquid
Color:	Red brown
Odor:	slight, amine
Odor Threshold:	No data available.
pH:	No data available.

Freezing Point:	18 °C
Boiling Point:	310 - 312 °C (1,013 hPa) 171 °C (1.33 hPa)
Flash Point:	143 °C (Tagliabue Closed Cup)
Evaporation Rate:	No data available.
Flammability (solid, gas):	This product is not flammable.
Flammability Limit - Upper (%)-:	No data available.
Flammability Limit - Lower (%)-:	No data available.
Vapor pressure:	0.026 hPa (138 °C)
Vapor density (air=1):	No data available.
Specific Gravity:	0.94 (15 °C)
Solubility(ies)	
Solubility in Water:	33 mg/l
Solubility (other):	No data available.
Partition coefficient (n-octanol/water):	log Pow: 3.7
Autoignition Temperature:	329 °C
Decomposition Temperature:	No data available.
Dynamic viscosity:	31 mPa.s (20 °C)
Kinematic viscosity:	29.6 mm ² /s (20 °C) 11 mm ² /s (40 °C)
Explosive properties:	Not classified.
Oxidizing properties:	Not classified.

SECTION 10: Stability and reactivity

Reactivity:	Material is stable under normal conditions.
Chemical Stability:	Material is stable under normal conditions.
Possibility of Hazardous Reactions:	None under normal conditions.
Conditions to Avoid:	Heating in air.
Incompatible Materials:	Strong acids. Strong oxidizing agents.
Hazardous Decomposition Products:	Emits acrid smoke and fumes when heated to decomposition.

SECTION 11: Toxicological information

Information on likely routes of exposure

Inhalation:	Toxic by inhalation.
Ingestion:	Toxic if swallowed. May cause damage to organs through prolonged or repeated exposure. Target Organ(s) : Liver.
Skin contact:	Toxic in contact with skin. Causes skin burns. May cause an allergic skin reaction.
Eye contact:	Causes serious eye irritation.

Information on toxicological effects**Oral**

Product: Oral LD-50: (Rat): 271 mg/kg Toxic if swallowed.

Dermal

Product: Dermal LD-50: (Rat): 756 mg/kg (Acute Dermal Toxicity)
Toxic in contact with skin.

Inhalation

Product: LC50 (Rat, 4 h): < 1.87 mg/l Toxic if inhaled.
LC50 (Rat, 6 h): > 0.6 mg/l Toxic if inhaled.

Repeated dose toxicity

Product: NOAEL (Rat(Male and Female), by gavage): 3 mg/kg (Target Organ(s): Liver) May cause damage to the liver.

Skin Corrosion/Irritation

Product: (Rabbit, 24 h): Severe

Serious Eye Damage/Eye Irritation

Product: (Rabbit): slight to moderate

Respiratory or Skin Sensitization

Product: Skin sensitizer (Guinea Pig): sensitizing

Carcinogenicity

Product: This product does not contain any carcinogens or potential carcinogens as listed by OSHA, IARC or NTP.

Toxicity to reproduction

Product: (Rat); NOAEL: 7.5 mg/kg; NOAEL: 22.5 mg/kg; Ingestion; Remarks: Conclusive but not sufficient for classification

Developmental toxicity

Product: Rat; NOAEL: 150 mg/kg; NOAEL: 25 mg/kg; Gavage (Oral); OECD Test No. 414: Prenatal Developmental Toxicity Study; Remarks: Conclusive but not sufficient for classification

Germ Cell Mutagenicity**In vitro**

Product: Mutagenicity - Bacterial: negative
Chromosomal aberration: negative
Mutagenicity - Mammalian: negative

In vivo

Product: No data available.

Specific Target Organ Toxicity - Single Exposure

Product: Inhalation: Not classified.

Specific Target Organ Toxicity - Repeated Exposure

Product: Oral: Liver - May cause damage to organs through prolonged or repeated exposure.

Aspiration Hazard**Product:** Not classified.**Other effects:** No data available.**SECTION 12: Ecological information****Ecotoxicity:****Acute hazards to the aquatic environment:****Fish****Product:** LC-50 (Fathead Minnow, 96 h): 0.13 mg/l**Aquatic Invertebrates****Product:** EC-50 (Water Flea, 48 h): 0.54 mg/l**Chronic hazards to the aquatic environment:****Fish****Product:** NOEC (Oryzias latipes, 30 d): 0.0037 mg/l Read-across from a similar material**Aquatic Invertebrates****Product:** NOEC (Water Flea, 21 d): 0.0057 mg/l Read-across from a similar material**Toxicity to Aquatic Plants****Product:** EC-50 (Algae (Pseudokirchneriella subcapitata), 72 h): 0.939 mg/l**Persistence and Degradability****Biodegradation****Product:** 12 % (28 d, Ready Biodegradability: CO2 Evolution Test) Not readily degradable.
Read-across from a similar material
50 % Inherently biodegradable Read-across from a similar material**BOD/COD Ratio****Product:** No data available.**Bioaccumulative Potential****Bioconcentration Factor (BCF)****Product:** Bioconcentration Factor (BCF): 125.9 (calculated)**Partition Coefficient n-octanol / water (log Kow)****Product:** Log Kow: 3.7**Mobility in Soil:** Log Koc: 2.77 (QSAR model)**Other Adverse Effects:** No data available.

SECTION 13: Disposal considerations**Waste treatment methods**

- General information:** The generation of waste should be avoided or minimized wherever possible.
- Disposal methods:** Dispose of waste and residues in accordance with local authority requirements.
- Since emptied containers retain product residue, follow label warnings even after container is emptied.

SECTION 14: Transport information

Important Note: Shipping descriptions may vary based on mode of transport, quantities, package size, and/or origin and destination. Consult your company's Hazardous Materials/Dangerous Goods expert for information specific to your situation.

DOT

Possible Shipping Description(s):

UN 2922 Corrosive liquids, toxic, n.o.s. (N,N'-di-sec-butyl-p-phenylenediamine) 8
(6.1) III

IMDG - International Maritime Dangerous Goods Code

Marine pollutant.: (N,N'-di-sec-butyl-p-phenylenediamine)

Possible Shipping Description(s):

UN 2922 CORROSIVE LIQUID, TOXIC, N.O.S. (N,N'-di-sec-butyl-p-phenylenediamine)
8 (6.1) III

IATA

Possible Shipping Description(s):

UN 2922 Corrosive liquid, toxic, n.o.s. (N,N'-di-sec-butyl-p-phenylenediamine) 8 (6.1)
III

SECTION 15: Regulatory information

Safety, health and environmental regulations/legislation specific for the substance or mixture.:

This product has been classified in accordance with hazard criteria of the Controlled Products Regulations and the SDS contains all the information required by the Controlled Products Regulations.
WHMIS (Canada) Status: controlled

WHMIS (Canada) Hazard Classification: D/1/B, D/2/B, E

SARA 311-312 Hazard Classification(s):

immediate (acute) health hazard
delayed (chronic) health hazard

US EPCRA (SARA Title III) Section 313 - Toxic Chemical List

NONE

OSHA: hazardous

TSCA (US Toxic Substances Control Act): All components of this product are listed on the TSCA inventory. Any impurities present in this product are exempt from listing.

DSL (Canadian Domestic Substances List) and CEPA (Canadian Environmental Protection Act): All components of this product are listed on the DSL. Any impurities present in this product are exempt from listing.

AICS / NICNAS (Australian Inventory of Chemical Substances and National Industrial Chemicals Notification and Assessment Scheme): All components of this product are listed on AICS or otherwise comply with NICNAS.

MITI (Japanese Handbook of Existing and New Chemical Substances): All components of this product are listed in the Handbook or have been approved in Japan by new substance notification.

ECL (Korean Toxic Substances Control Act): All components of this product are listed on the Korean inventory or otherwise comply with the Korean Toxic Substances Control Act.KE-03304

Philippines Inventory (PICCS) : All components of this product are listed on the Philippine inventory or otherwise comply with PICCS.

Inventory of Existing Chemical Substances in China: All components of this product are listed on the Inventory of Existing Chemical Substances in China (IECSC).

SECTION 16: Other information

HMIS® Hazard Ratings: Health - 3*, Flammability - 1, Chemical Reactivity - 0

HMIS® rating involves data interpretations that may vary from company to company. They are intended only for rapid, general identification of the magnitude of the specific hazard. To deal adequately with the safe handling of this material, all the information contained in this MSDS must be considered.

Revision Information: Not relevant.

Key literature references and sources for data: Chemical Safety Report

Training information: No data available.

Issue Date: 05/18/2015

SDS No.:

Disclaimer: This information is provided without warranty. The information is believed to be correct. This information should be used to make an independent determination of the methods to safeguard workers and the environment.
